WA-KEENEY, KANSAS, MAY 16, 1918

40th Year—Number 12

By J. L. JOHNSTON

Chairman, Second War Fund Campaign
American Red Cross, Southwestern Division

There Is No Argument!

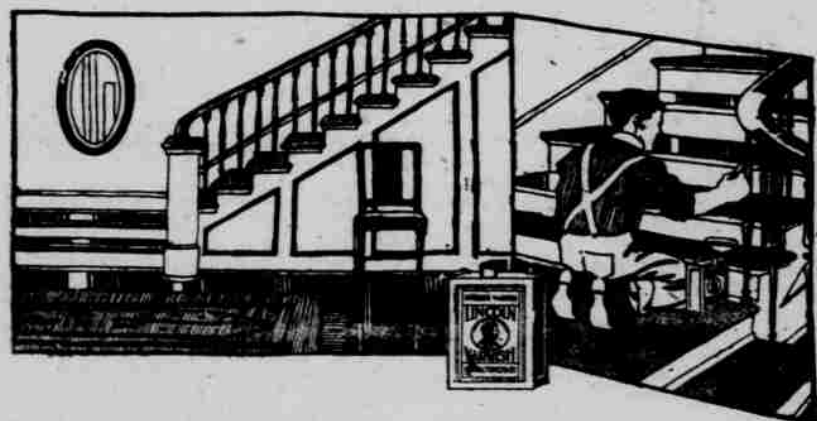

Time as well as food must be conserved if our ambitions for a quick victory are to be realized.

Conserve the time of men who appeal to you for subscription for the Second Red Cross War Fund. Be ready to say "I will" when the solicitor calls upon you. He is as busy as you and is giving his time to the Red Cross, and his money, too, but asks you only for the money.

There is neither reason or time for debating over the wisdom of giving to the Red Cross. If there is any argument, it should be not "What is the MOST I can give?" Have this argument with yourself BEFORE the solicitor calls.

A Kerosene Attachment For Your FORD

Guaranteed to Cut Your Fuel Cost 50 per cent

THE BURN OIL DEVICE AND ITS PRINCIPLE OF OPERATION
The principle on which the Burn Oil Device works is practically illustrated by you taking a tablespoonful of cheap kerosene and throwing it on top of your cook stove. As soon as the oil comes in contact with the hot stove plates, you will notice a vapor or gas generated immediately. That is just what occurs with the Burn Oil Device. The interior passage of the device through which the fuel is drawn from the carburetor is tremendously heated by the steady stream of exhaust flames from the engine cylinders. As a result, immediately as soon as the kerosene vapor or any fuel used leaves the carburetor it strikes the hot interior walls of the Burn Oil Device and is generated into a gas while traveling through the intake passage from the carburetor to the engine cylinders. Hence, your car operates on a gas instead of raw fuel.
